

FOR THE FULL-SCREEN DEVICES

HOME PAGE:

iLoy – Clickable – take you back to home page.

Home – Clickable – Switch back to home page.

Manage – Clickable – Switch to Manage Employee Section.

Footer has no link. Replicated from the actual footer of iLoy group.

MANAGE PAGE:

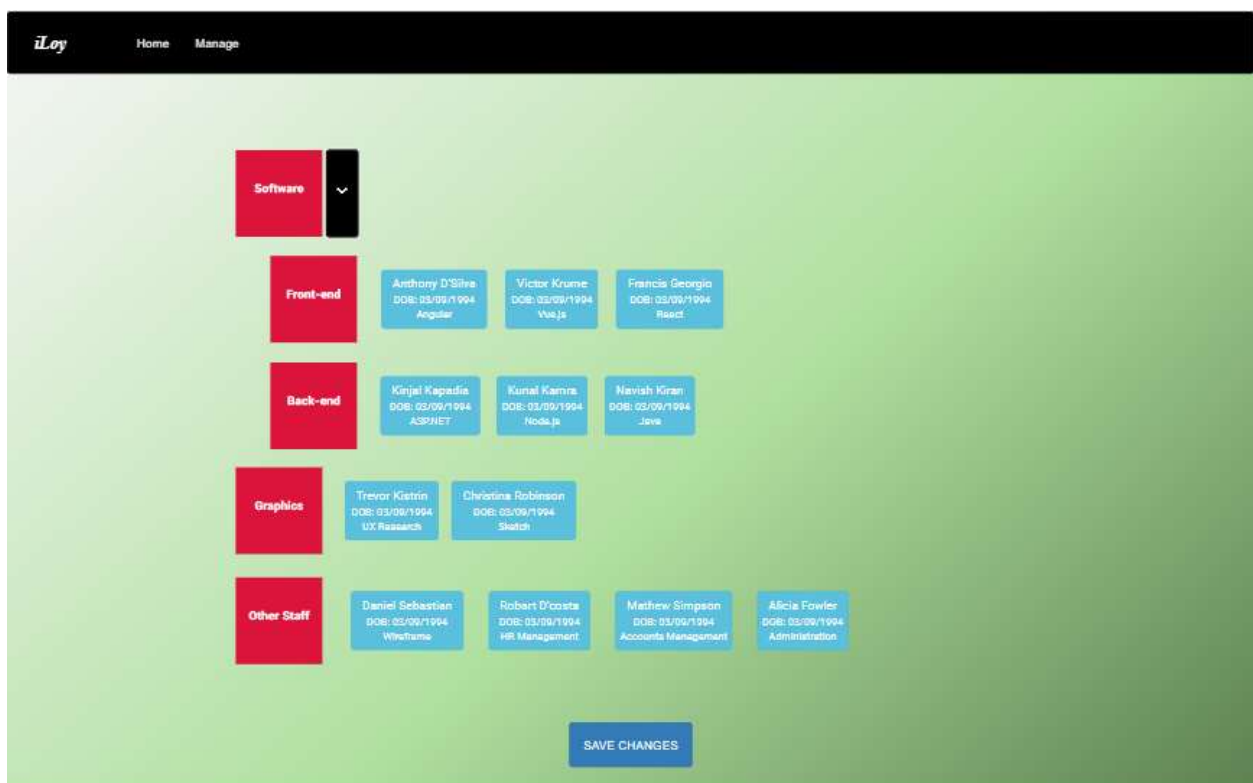

DEFAULT VIEW: It has the Department and Employee information in non-extended state. Here, only parent departments are shown. The parents having child, has arrow bar next to them. These child departments will be hidden in the default view.

Arrow button – Clickable – Open the child view if any.

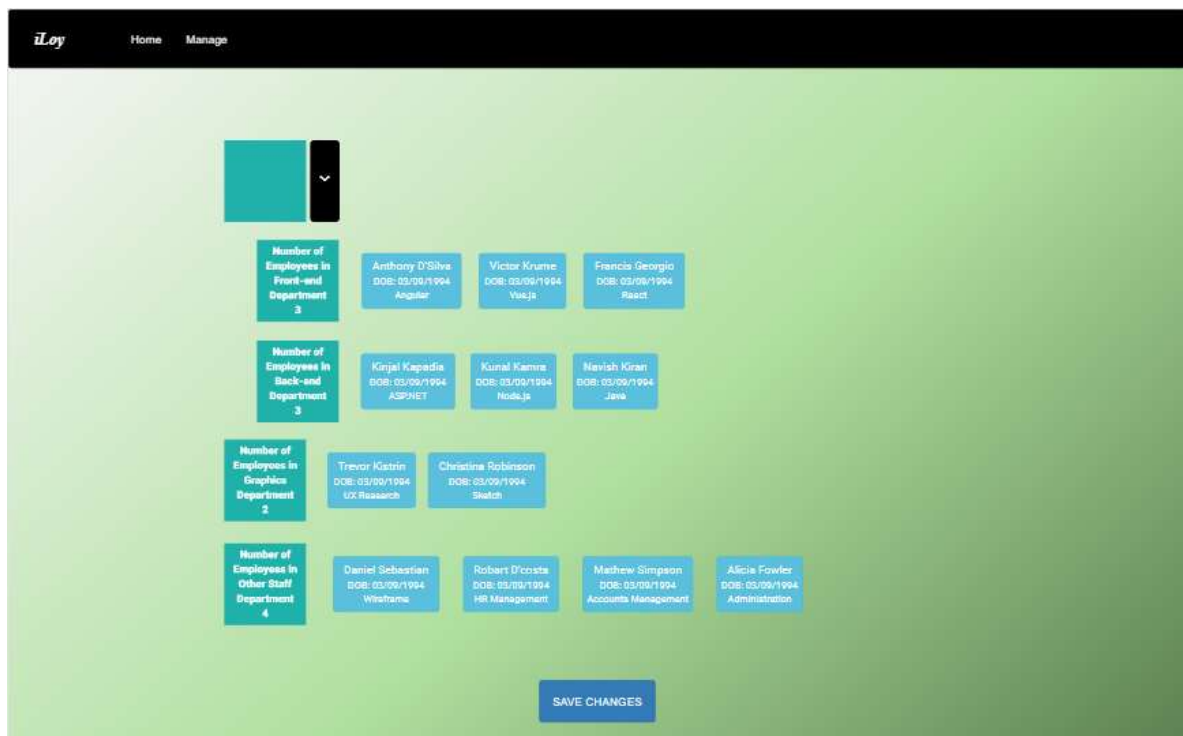

Save Changes – Button – Clickable – Saves the updates and returns and update message.

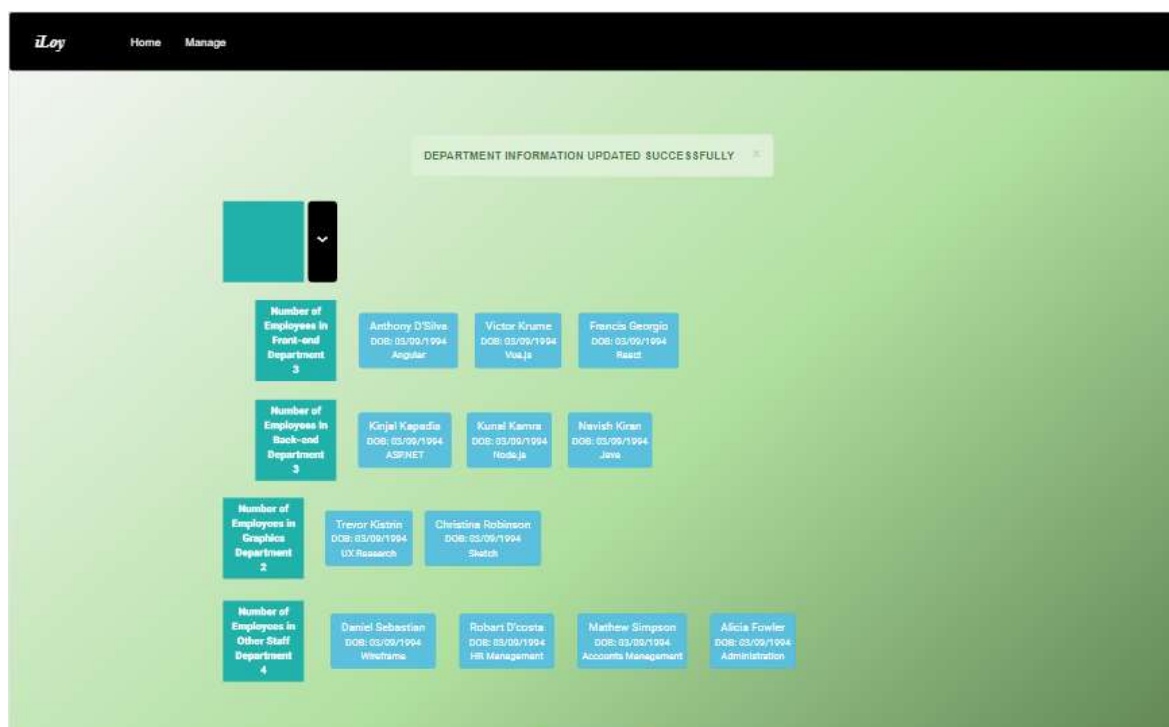

EXTENDED VIEW: Clicking the arrow button reveals the child and their employee information.

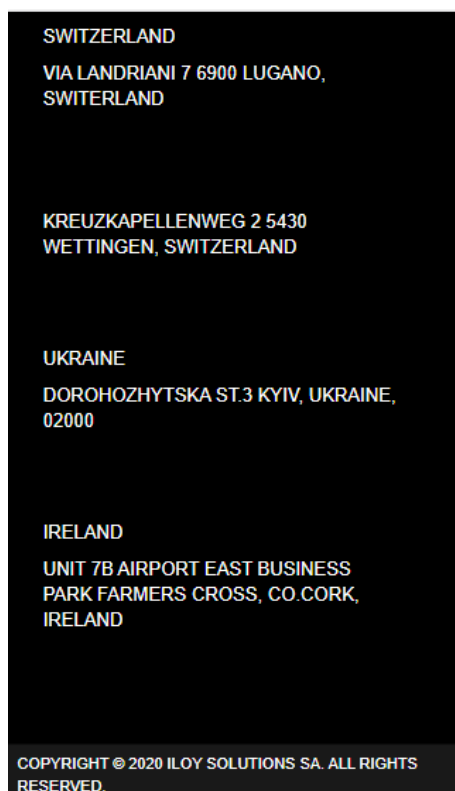

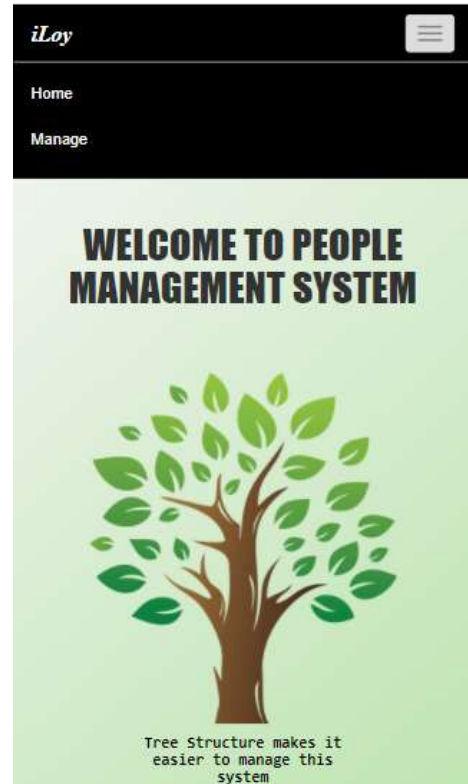

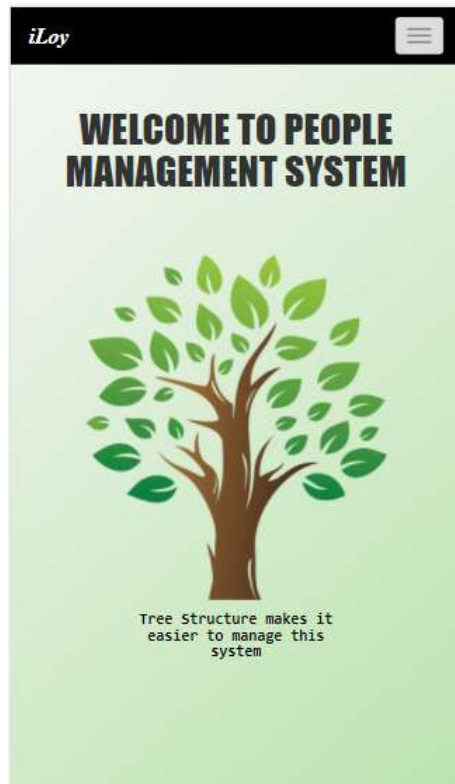

If the card showing department name is clicked. It gives a animation and flips the card to reveal the number of employees present in the department.

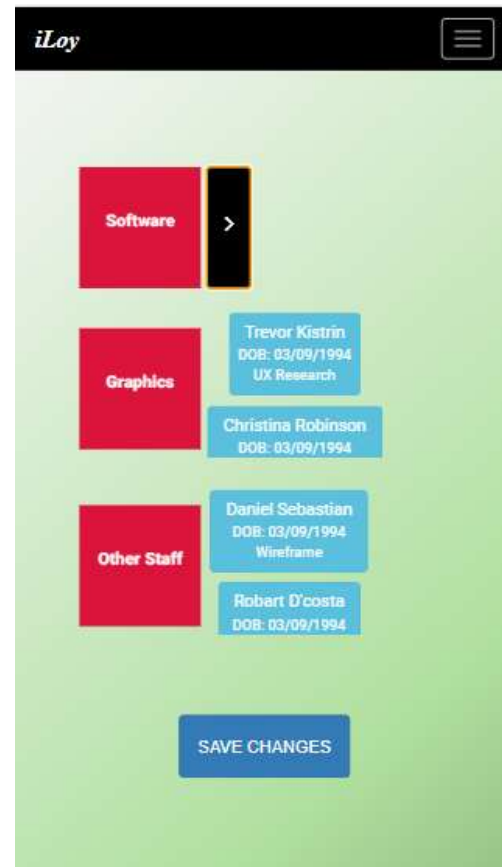

On click of save changes, the request is sent to the server to save the Department Information in our Database. We will receive the success or error message from the server which is displayed as shown below:

RESPONSIVE LAYOUT FOR MOBILE DEVICES:

- This is the manage section in mobile view.
- As we have a limited place to display the Employees, we have introduced a scroll functionality for the Employees section.
- So, in case of mobile devices, we can scroll through different Employees of the department keeping the presentation and providing good User Experience.

This responsive design switch at the width of 800px.

The Loader is present on the manage section till we fetch the Department Information from the service.
